Inspection Notes

Notes: Receiving kitchen; food catered from SDC.

A 2 compartment sink is being used to wash utensils or equipment used during serving lunch and after school children. Setup the left side of the sink with soap and water. The right side of the sink is to be set up with sanitizer. Provide test strips for testing the sanitizer concentration. When washing utensils/equipment, ensure that all staff know the correct warewashing procedure. Wash with soap and water, rinse (rinse back into the wash bin), and then rinse with the sanitizer concentration. All utensils and equipment must be air dried.

Provide signage in the restroom stating that all employees must wash their hands after using the restroom. This sign may be homemade.

Move the hand soap dispenser and the towel dispenser so that they are located over the left sink basin at the warewash sink. The left side is the only side that is approved for hand washing. The right side of the 2 compartment sink should always be kept clean and sanitized.
